

Ms. Ricks,

If you want to get comments on the record, I would recommend that you contact Ms. Michelle Miller in the Hernando County Planning Department. It is my understanding that Ms. Miller is the planner working on this project review for the County. Ms. Miller has been copied on this email.

However, I can tell you that the Public Works Department is requesting that this connection be made between Preston Hollow and the new project. When the plat for Preston Hollow was recorded, the right of way for Forrest Crest Way was platted to the property line. This indicates that Forrest Crest Way was intended to provide a future connection to the property to the west. We believe that by providing this connection will be beneficial from a traffic operation standpoint.

I have attached a copy if the Plat for Preston Hollow Unit 2 Phase 2 for your information.

Respectfully

Scott Herring
